The maXia™ Rugged NVR is designed especially for operation in harsh environments such as those found in industrial settings, mobile applications or in standard applications where the NVR will be located for example in the ceiling, near high/low temperatures, or exposed to other severe conditions. Whether in a moving vehicle or at a fixed location, the Rugged NVR is capable of withstanding unexpected bumps and bruises, takes up very little space when installed under a seat, in a trunk or covertly installed above a drop ceiling and can deliver nonstop IP video recording (up to 30MP).

NVR-RUGGED

When we started the maXia Solutions Group Division in 2017, our mission was to become a leading provider of hand-built-in-house hardware solutions, revolutionizing the industry through our unwavering commitment to customer satisfaction, craftsmanship, and value. 7 years and thousands of systems later, we're well on our way to this goal and here are some of the reasons why:

- Hand-Built in North America
- Vendor/Manufacturer Agnostic
- 20-50% Cost Savings
- Dedicated System Design and Technical Support (Pre- and Post-Sales)
- Significantly Improved Performance and Reliability vs. OEM Over 25 Years Experience

QUALITY

maXia™ systems are hand-built using premium components in a static and shock-free environment, leveraging knowledge gained from 20 years building video recording and related systems. We maintain close relationships with key component manufacturers and track versioning, revisions, failure rate and other key data to ensure the highest combination of performance and reliability goes into every system.

CUSTOMIZATION

Every maXia™ system starts with the basics, working component-by-component to ensure that you get the features and performance required while reducing unnecessary add-ons. This creates an accurate, reliable solution tuned for your exact application. The result - commonly 25-50% lower cost than an OEM brand.

TECHNICAL SERVICES & SUPPORT

maXia™ Solutions Group technical services staff are fluent in the top VMS and access control software platforms, with advanced knowledge of CCTV integration, networking, complex hardware designs, and enterprise level equipment deployments.

KNOWLEDGE

20 years of front line experience designing and manufacturing hardware for video recording and management of related VMS platforms and network architecture. Our dedicated team of Solution and System Design Specialists work closely with our system integration partners to design and build each system.

AGILITY

maXia™ Solutions Group provides a suite of professional services including 3rd party financing and leasing options, one-on-one technical support, remote setup and configuration, independent training sessions, site visits to your end user and more!

5 YEAR MAXIA™ SERVICE & SUPPORT PLAN

Our 5 year warranty option provides extended coverage, demonstrates the confidence that we have in each system we build and provides added reassurance to your end user.
